

Croydon University hospital (ex Mayday hospital)

Approaching from Canterbury Road it's a left and then a right into Mayday Road ...

... drive past the ambulance entrance to Accident and Emergency and enter through the next entrance into the car park for A&E

Enter the Woodcroft Wing through the automatic double doors labelled in the pictures

Immediately inside there is a telephone (if needed) on the opposite wall of the corridor

Turn right and just beyond a lift there are some double doors secured with a keypad lock

Open the door – code 2411 – and go in, then immediately on the right is another lift, this one is **Lift 11** – take this lift to the 2nd floor

Turn left out of the lift and you will see some double doors with a Blood Sciences sign over them ... go in the door immediately to their left (there is another phone between these two entrances)

You will then be in a small lobby with a stable door opposite you ... press the bell push to the left of the door to summon the duty BMS to take delivery

You can contact the laboratory from internal phones by:

- dialling 8, waiting for the bleep service announcement, then dialling 141 followed by the extension number you are calling from, then hang up and the BMS will call you back
- dialling 0 for the operator and asking them to bleep the duty BMS on 141
- on extension 3466 – but this phone may not be answered out of hours
