Delivery to Frimley Park Hospital

- After 22h00 the main entrance is closed (but if it's open you can use it and go straight through to the 'Yellow Street' and turn right – then see below when you arrive at the 'Blue Street')
- It is suggested that you park in the drop-off area near the main entrance
- Ensure you do not cause an obstruction and that it is obvious you are delivering blood
- There is a large entrance signposted as the Emergency Department
- This leads you to the reception area for the walking wounded; on the far side to the right is the entrance to a corridor with a dark blue sign saying "This way to Central Delivery Suite and all wards"
- Follow the corridor into a larger corridor, turn right and follow the this one left into the 'Yellow Street'
- Turn right into 'Yellow Street' and walk quite a way to the 'Blue Street' and turn left
- Pathology is clearly marked on the left of Blue Street where there are a set of double doors and a small (closed) hatch signed 'Pathology Sample Reception'
- To the right of the hatch is a visible "SERV Rider" notice and a phone so you can ring the duty Biomedical Scientist (BMS) on extension 4408 or 4196
- Someone will come and collect your delivery
- If they take you inside you will pass through two key coded doors that can be opened from the inside and a card lock door that is released by a green button on the right-hand wall on the way out
